

Markibar IZAGA Grinder

FEATURES

DESIGN

Easy access for maintenance
Modern and functional aesthetics
High quality materials

ADVERTISING PANEL

Customizable backlit screen

DISPLAY

Keyboard Options:
Alphanumeric display
TFT touch screen

Setting:
1 and 2 coffee doses,
independently programmable
Pre-ground or On Demand mode
Coffee's accounting
(total and partial)

HOPPER

1.500 g hopper
Anti-rotation system
Customizable
Easy extraction for cleaning

TECHNOLOGY

Isolated grinding chamber
Grinding parameter stability
guaranteed
Smart ventilation
Long-life burrs
High reliability design

COFFEE DOSER

Automatic 1 or 2 coffees
porta-fi lter detection
Freshly ground coffee
Instant delivery
Compact dose without spillage

SPECIFICATIONS

Dimensions (L x W x H)

640 mm x 180 mm x 352 mm

Connected load

230 V - 50 Hz

Power

525 W

Grinding burrs speed

1350 rpm

Net weight

16 kg

Burrs

Ø 64 mm. Plain

Hopper capacity

1,5 kg / 3,3 lb

Production per hour

8 kg/h

Grinder capacity

4 g/s

Single dose

5 - 18 g

Double dose

5 - 28 g

DESCRIPTION

The advancements in today's grinder technology addresses the problem of quality, consistency, speed and wastage. Traditional grinders feature a dosing chamber leaving it up to the barista to dose the coffee into the portafilter by pulling a dosing lever. This operation is not only slow, it is highly inconsistent and usually ends up with ground coffee sat in the chamber for extended periods of time, effecting the freshness and quality of the coffee. The first generation grinders that grind on time have a high level of inaccuracy in the dose level of the coffee and are relatively slow.

The Markibar Izaga grinder combines excellence in practicality and functionality and is one of our favourite grinders available. The grinder features two operating modes: Pre-Grind and Grind On Demand.

In Pre-Grind mode, the Izaga delivers an instant dose, allowing baristas to allocate time spent grinding elsewhere in their workflow, saving up to seven seconds per double dose. The Izaga's Grind On Demand mode cater for off-peak periods, grinding each shot fresh on demand.

The Izaga features an isolated grinding chamber and smart ventilation system for cooler grinding, eliminating temperature fluctuations present in many grinders. The Izaga is made from high quality materials, is simple to operate and extremely accurate in terms of dose. It has a 1.5kg hopper that is customisable to promote your brand.
